

Bird Beak Adaptations – What Bird Beaks Reveal about a Bird’s Diet

In this playful lesson students discover how much the shape of a bird beak can tell about the bird’s diet and habitat. Students then choose an imaginary bird habitat and design their own bird. This class is a great art extension to your unit on adaptations.

Grade level: 1st to 5th grade

Number of students: 25 students max

Duration: 1 hour

Cost: \$3 per student
